

# 'INTERRA

— Developer of Uniqueness —

## QUALITY POLICY

As we Interra in line with the mission and vision of our company;

- To ensure the continuity of our customers' satisfaction with our products and services,
- To ensure continuity in the quality of our products in order to increase the satisfaction of our customers,
- To provide a strong coordination that will ensure that we accurately determine what our customers want and meet with high quality awareness,
- To fully meet the needs and expectations of the customer in all processes,
- Aiming to achieve the highest performance in our processes by considering the relevant risks and opportunities,
- Ability to switch to new products and technologies quickly and reliably,
- Developing creative and innovative products and services in line with customer expectations by supporting business processes with new ideas,
- To give importance to quality planning and to take the necessary measures to make reliable measurements,
- To implement and document our quality management systems in a way that fulfills the requirements of international quality management systems,
- To adopt quality awareness and questioning as a corporate culture with a guiding point of view,
- Evaluating and improving all our activities with the philosophy of "continuous improvement",

Our quality policies have been adopted as our principles.
